

Chris May – Information Security Consultant, Advantage Technology

As the Information Security Consultant for Advantage Technology, I am charged to work closely with executives and heads of departments to determine/research specific security issues and provide direction on security standards, security systems and authentication protocols. Proficient at coordinating cross-functional teams to plan, research and design robust security architectures for IT projects. My ability to determine the most effective way to protect computers, networks, software, data and information systems against any possible attacks is an asset to our clients and partners.

A highly motivated executive manager with a professional background in technology, sales, marketing, and chemical operations management. Experience directing all core business and other functional disciplines including, but not limited to, marketing, human resources, sales, technology and operations management. Outstanding consensus building and project management expertise. Proven capability for leading, motivating, and developing a staff of diverse backgrounds and expertise, across multiple operations.
